

Shoptech™ Series 650 ESD

# Shoptech™ Series 650 ESD

## ESD (Electrostatic Dissipating) Seating

Horizon's **ESD** seating is designed for use as part of an overall ESD control program in areas where control of static electricity is crucial. ESD seating products are engineered to control discharge of static electricity by "wicking" static away from the user, sensitive electronic components and volatile chemicals and materials. ESD environments typically include specialized wrist straps, work surfaces, footwear and flooring designed and engineered to ground and eliminate static buildup.

### 650 ESD Stool Specifications

#### 650ESD-01

Mid Back Multi-Tilter - Pneumatic seat height adjustment. Backrest height adjustment. Independent, infinite position back and seat angle adjustment with tilt lock control. Tilt-tension adjustment. Forward seat tilt lock control. Injection molded seat cushion. Polished aluminum base and chromed gas cylinder.

The 650ESD chair is made from high quality conductive fabric or vinyl. Chair has a five-legged aluminum base which offers great stability as well as a highly reliable electrostatic discharge. The ESD chair has castors which are coated with conductive urethane and are suitable for hard floors.

**Note: Armrests are non-conductive if added.**
